

ADARSH DN PATHAK

COMPUTER SCIENCE STUDENT | BACKEND & REAL-TIME SYSTEMS

+91 73790 75061 | adarshpathak2006@gmail.com | github.com/adarsh-pathak-2006

PROFESSIONAL SUMMARY

Computer Science and Engineering (AI & ML) student and backend developer with hands-on experience building and deploying REST APIs, real-time WebSocket systems, and AI-enabled applications. Skilled in Python, Django, Django REST Framework, PostgreSQL, Redis, authentication, caching, and cloud deployment.

TECHNICAL SKILLS

Programming: Python, JavaScript, HTML5, CSS3

Frameworks: Django, Django REST Framework, Django Channels, Next.js, React.js

Backend & APIs: REST APIs, WebSockets, JWT Authentication, AI API Integration, Background Workers, System Design

Databases & Caching: PostgreSQL, MySQL, SQLite, Redis, Neon, Supabase

Cloud & DevOps: AWS, Docker, Render, Vercel

Developer Tools: Git, GitHub, Postman, WordPress

EXPERIENCE

Web Developer & AI Workflow Developer Intern | Expose Trendze | Mar 2026 - Jun 2026

- Developed responsive interfaces and backend workflows for internal tools and client-facing applications; collaborated with the team on feature implementation and deployment.
- Designed and integrated AI-assisted automation workflows that streamlined repetitive internal tasks and reduced manual effort.
- Diagnosed and optimized full-stack features, resolved defects, and contributed to release cycles and production deployments.

PROJECTS

Where Is My Train Backend | [GitHub](#) | [Live Demo](#)

- Built a REST backend for real-time train location tracking using Django Channels and WebSockets.
- Improved API scalability and latency with Redis caching, optimized Django ORM queries (`select_related` and `prefetch_related`), and signal-based cache invalidation.

Technologies: Django, Django REST Framework, Django Channels, WebSockets, PostgreSQL, Redis, Render, Vercel

Multiplayer Tic-Tac-Toe Backend | [GitHub](#) | [Live Demo](#)

- Engineered a real-time multiplayer game backend with Django Channels, WebSockets, and Redis to synchronize game moves.
- Secured REST API endpoints and WebSocket handshakes with JSON Web Tokens using `rest_framework_simplejwt`.

Technologies: Django, Django REST Framework, Django Channels, PostgreSQL (Neon), Redis, Render, Vercel

AI Interview System | [GitHub](#) | [Live Demo](#)

- Developed an AI-powered mock interview platform that generates and evaluates interview questions in real time through the OpenRouter API.
- Architected the REST backend and PostgreSQL (Neon) data layer; deployed the application with Render and Vercel.

Technologies: Django, Django REST Framework, OpenRouter API, PostgreSQL (Neon), Render, Vercel

Ekokintsugi | Internship Project | [GitHub](#) | [Live Demo](#)

- Built and deployed a full-stack application with Next.js, React.js, and Supabase database and file storage using an AI-assisted development workflow.

Technologies: Next.js, React.js, PostgreSQL, Supabase, Antigravity, Render

EDUCATION

B.Tech in Computer Science and Engineering (AI & ML) | Ashoka Institute of Technology and Management, Varanasi, India | Expected 2028
